Introduction

Raytheon Technologies is a multinational conglomerate that specializes in defense, aerospace, and cybersecurity technologies. Raytheon Technologies was formed in 2020 through the merger of Raytheon company and United Technologies Corporation. Raytheon Technology is a developer and manufacturer of products including aircraft engines, cybersecurity solutions, satellites, and drones. RTX operates in three business segments which are Collins Aerospace, Pratt & Whitney, Raytheon including intelligence & space, and Raytheon Missiles & Defense. Collins Aerospace focuses on technologies including advanced structure, avionics, interiors, mission systems, and control systems catering to customers in commercial, regional, business aviation, and military sectors. Pratt & Whitney engineers, produces, and maintains the world's most sophisticated aircraft engines and auxiliary power systems.

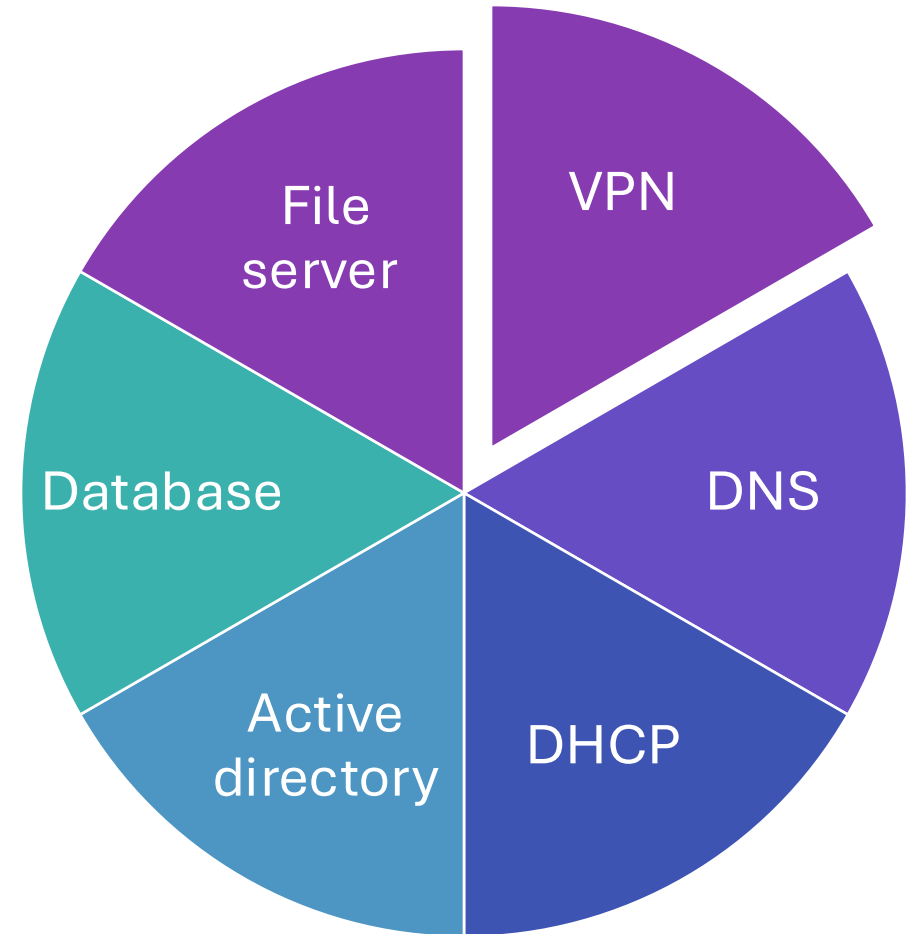

RTX Network

- LAN network : A network connects computers and devices within the area.
- WAN network: Network communication that covers large geographical areas, connecting multiple LANs.
- Cybersecurity infrastructures :include the policies, processes, technologies, and controls to protect the information.
- Cloud computing: a model for delivering computing resources over the internet.
- Internet of Things (IoT): refers to the interconnected network of physical devices embedded with sensors, software, and other technologies.
- Window Server 2016 Administration: involves managing and maintaining a Window Server 2016.

RTX network services and technologies

Conclusion

RTX is corporation provide different technologies such as defense materials , Aerospace, cybersecurity solutions. for the business to go in smoothly and secure and advanced RTX implement different type of network and technologies, and IT services.
